# THE CHOICE OF CHAMPIONS

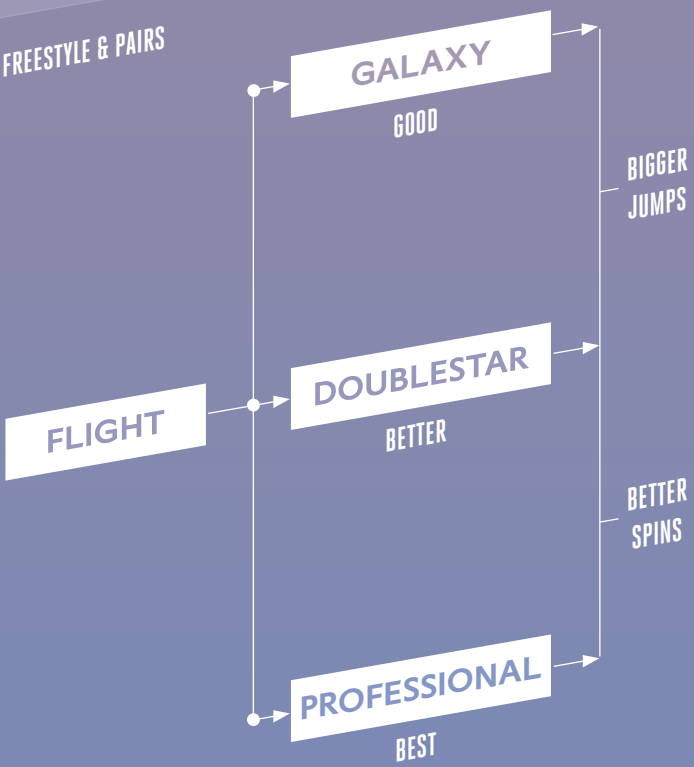

MK is all about performance. Yours and ours.

The finest steel is selected then laser cut for supreme accuracy (within 0.004 inches). Just like your routines, our blades have to be millimeter perfect. A meticulous 55-step process is then undertaken to ensure a robust, flexible, competitive blade that's made to go the distance.

And finally, our master craftsmen apply their expertise for the ultimate finish.

# FLIGHT

## FIRST CLASS FOR BEGINNERS.

The MK Flight was released in 2015 to meet the specific needs of the entry level skater. As skaters' needs developed and changed over the years, the team at MK set out to create a blade that satisfied the elementary market. Unlike our beginner blades of the past, the Flight's profile has been flattened to perfectly suit boot/blade combination sets. The Flight is also the lightest blade of its kind in the world! This blade gives beginners an 'edge' as they set off on their journey to push boundaries. Made of 1075 Carbon steel, no blade has this quality for the price.

RECREATIONAL AND SINGLE JUMPS

# GALAXY

## NO LIMITS TO YOUR PROGRESSION.

The latest offering in the MK product range, the new MK Galaxy features an unmatched chrome finish and cross-cut teeth. While skaters leave their boot/blade combination sets for the first time, the Galaxy is an option which provides optimum bite for those learning their toe jumps and was designed to accommodate all basic skills required of the beginner freestyle and synchronized skater.

SINGLE JUMPS

# DOUBLE STAR

## MASTER OF ALL.

The MK Double Star blade is perfectly suited for a skater leaving a combination set and remains unsure about which discipline they might end up choosing due to its versatile features. The Double Star has two bottom picks and a cross cut section which gives skaters the freedom to explore new elements. If you're still unsure about whether or not you want to take skating beyond the axel, this blade is for you.

SINGLE JUMPS

# PROFESSIONAL

## DOES THE JOB AND MORE.

The MK Professional is widely acclaimed for its balance, performance and style. A parallel sided blade, the Professional is the premier choice of coaches for their experienced freestyle students around the world who are working on their axel up to the double lutz jump. The elongated 7 ft rocker profile has minimal blade contact with the ice while performing spins, allowing you to create less friction for a faster and longer spin.

# MADE IN ENGLAND

Designed and crafted in the UK, but exported to the  
4 corners of the earth for global domination.

# VISION

## BECAUSE THE BAR KEEPS ON RISING.

The MK Vision blade is a parallel sided option within the advanced freestyle skating range which features straight cut teeth and a tapered top toe pick. While the primary radius remains the iconic 7 ft curve, the secondary radius and tooth configuration provide more stability prior to toe pick engagement on jump takeoffs which allow for greater control and speed upon landing. If you're an accomplished freestyle skater looking for explosive jumps and optimal bite as you develop double lutz through triple lutz, this is a sensible option.

# PHANTOM

## HAUNTS THE COMPETITION.

The performance advantages of the MK Phantom cannot be overstated for the advanced freestyle skater. A legendary option, the Phantom is side honed, tapered and specifically designed for triple and quadruple jumps. Taking information from world-class skaters, the MK engineers were advised to build this blade with a smaller 7 ft radius section to allow for deeper edges and easier turns. Designed for the explosive jumper, the cross hatched teeth enable jumpers to secure the ice deeply and an enlarged top toe pick is sure to aid in toe spotting. At Sochi 2014, this blade was worn by multiple medallists and is certainly no stranger to the podium.

# DANCE

## TWIZZLE MACHINE.

When it comes to dance blades, look no further than the podiums to make an educated decision. At Sochi 2014, every Ice Dance medallist used the MK Dance for its slimline design which allows the dancer to move from one edge to the other much quicker. Essentially, the unique configuration of this blade allows skaters the advantage of employing less body lean to change their edges. It is because of this that the Dance is also worn by the world's elite synchronized skating teams. This is the choice of champions.

# GOLD STAR

## THE UNDISPUTED KING OF SPIN.

The choice of numerous World and Olympic Champions, this superb blade epitomizes MK's craftsmanship. The MK Gold Star is side honed and tapered which provides more defined edges and increased angle for tighter turns. Due to the complexity of its secondary radius, the Gold Star has more of a heel lift than most freestyle blades which also aids in spin technique. If you're an advanced freestyle skater performing triple or quadruple jumps who's seeking a blade which will enhance spins, the Gold Star is our recommendation.

PARABOLIC BLADE  
TECHNOLOGY  
MAXIMIZES EVERY  
SINGLE ONE

# PARABOLIC

The unique curvature of a Parabolic blade enables it to bite deeper into the ice. This means smoother, sharper and more energetic spins, turns and edge work no matter what level you're skating at. And, as your weight is centered due to precision geometry, you have increased levels of control and confidence to maximize your true potential.

APPLY REVOLUTION TECHNOLOGY TO  
OUR PRECISION BLADES

# REVOLUTION

Revolution is the pinnacle in blade technology combining the traditional merits of a steel blade alongside the benefits of weight reduction and flexibility through the use of carbon fibre.

The results are unparalleled. The fusion of old and new technology allows skaters to move across the ice at increased speeds, make higher jumps, and cushion-land them, with greater control to reduce the risk of injury.
